Introduction

The Teacher Education Program (TEP) of the San Germán Campus of the Inter American University of Puerto Rico received a seven-year accreditation in June 11, 2012. During academic year 2012-2014, from August, 2012 to May, 2013, the TEP proceeded to collect data with the same instruments used in the *Inquiry Brief (IB)* submitted in November, 2011 to TEAC. The alignment and reliability of the instrument were revised and confirmed. According to this revision, the PCMAS' reliability (Teacher Certification Standardized Test) for Major and of Professional competences [Subject-matter Knowledge and Pedagogical Knowledge] was calculated.

In the other hand, a base-line data was determined with pedagogical knowledge final department exams (new instruments). The reliability of these exams was also calculated. These final department exams add another assessment of the pedagogical knowledge of our students in specific core courses. Data from these exams will be collected each year during the seven-year accreditation in order to be included in the *IB* for 2019.

The Faculty presents the annual report of the TEP in summary tables for each of our Claims. It is also presented how we attend the weakness in 2.3 in the Inquiry Brief (November, 2011).

The updated data tables of the IB of November, 2011 are included in Appendixes. The updated data spreadsheets in Excel are in separate electronic archives.

Progress on attending the weakness in the Inquiry Brief (November, 2011)

In July 3, 2012, Dr. Mark LaCelle-Peterson, President of the Teacher Education Accreditation Council (TEAC) confirmed to Dr. Miriam Padilla, Director of the Department of Education and Physical Education at the Inter American University of Puerto Rico, San Germán Campus, “that the Accreditation Committee of the Board of Directors of Teacher Education Accreditation Council (TEAC) concluded at its meeting on June 11, 2012 that the evidence presented in your *Inquiry Brief*, as verified by the audit and evaluated by the Accreditation Panel, merits Accreditation status”. The Accreditation was granted for seven years “with one weakness and no stipulations”.

The weakness was indicated in 2.3: “Some of the inaccuracies in the reported quantitative data are significant enough to potentially mislead the faculty”. During the academic year of 2012-2013 and in the present annual report we attended this weakness with the following actions:

- Revision of local and external (PCMAS) quantitative instruments' reliabilities, recalculation and confirmation of them. We rounded to the thousandth (10^{-3}) for the reliability coefficients.
- Use of official PCMAS' reports (from the College Board) as primary source of data, especially for subject-matter knowledge and pedagogical knowledge.
- Tabulation of all data for each claim with Excel spreadsheets. Data was rounded to the hundredth (10^{-2}) for the means and percentages, and to the thousandth (10^{-3}) for the standard deviations.
- Interpretation of data confirmed with the scale of each instrument.
